## DETAILED ACTION

### ***Double Patenting***

1. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

2. Claims 17 and 24-27 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-3, 7 and 13 of U.S. Patent No. 6,657,706 to Levine et al. (hereinafter, Levine). Although the conflicting claims are not identical, they are not patentably distinct from each other because all of the limitations of the claims in the present application are present in the corresponding claims of Levine. The following is a chart showing the rejected claims of the present application and their corresponding claims from Levine.

#### **Present Application's Claims**

#### **Levine's Corresponding Claims**

17	1
24	2
25	3
26	7
27	13

***Allowable Subject Matter***

3. Claims 1-16 are allowed.
4. Claims 18-23 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
5. Claims 17 and 24-27 will be allowable if the double patenting rejection above is overcome.
6. The following is an examiner's statement of reasons for allowance: Claim 1 requires "a drift region, formed in [a] substrate, for receiving [an] electric charge from [a] light sensor and producing a spatial charge distribution therein in response to an electric field. . . ." The cited references do not teach the use of a drift region which receives an electric charge and produces a "spatial charge distribution therein in response to an electric field." U.S. Patent No. 5,056,914 to Kollodge (hereinafter, Kollodge) teaches the storage of charge received from light pulses at individual pixels for determining the flight time of the pulse but does not teach the use of "drift region" which produces a "spatial charge distribution."

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

**Conclusion**

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

The references that have been made of record have been cited to show the current state of the art of light sensors which store charge for later measurement.
